GOT IT.

I'll owe you a beer in Astoria when this is all done.

Thanks. -BC

Probably, though I don't have an email that notes a stripped attachment...so still a little mysterious on my end.

Anyway, often renaming a .zip file to a new suffix (I use .piz) works.

I sent it so your firewall must have stripped it.

I didn't get a zip file...only Q2K files...at least so far.

Well the zip file I sent you had the version 41 model in it, so you do have it.

But I will try to put my version on our FTP site.

Will let you know soon.

FTP would save me the trouble of trying to figure out if I've got a version 41 in hand...I haven't checked yet. Thx.

I found a version of the model (version 41) with all of my charts and supplementary DO and pH change calculations and analysis. If you want it, let me know.

Jim

Here are some more q2K files for different scenarios that I ran in 2011 that support the memo that I sent you that was drafted for Ecology's Water Quality (Charlie McKinney (now retired) at the Central Regional Office in Yakima). These were also used with the version 41 QUAL2Kw model.

Jim
